I'm going to be in the Hancock area for a PHW seminar April 12th-15th. It seems we are staying at the Delaware River Club.

Can anyone point me in the right direction as far as fly selection and hatches. I'm guessing with this long winter it's going to be too early for hendicksons and quill gordons. Is there any dries, nymphs or streamers that I should not be without?

Any advice would be greatly appreciated.

Thanks,

Dan O.
