I am not advocating "no fracking" but I am advocating being careful enough to have no accidents. "

Then you are, in effect, advocating no fracking with those standards. Nothing is 100% safe.

By the way, on a year to year basis, I am pretty sure the PFBC is polluting more streams than all the fracking companies combined.

Nothing is fool proof, but there is NO reason why fracking can't have the same accident record nuclear power. 42 minor incidents and 1 'major' incident over 60 years is pretty good. I'm willing to bet that there has been more than 42 minor incidents involving fracking operation in the last 6 months.

One accident is one accident too many.
