"good point, but i believe bait rods work with lures. if they want to bait fish they can fish ponds.

fly and lure guys couldn't take fish either, which i'm sure some people would not be happy about - but if the fishing was better the sacrifices would be worth it imho."

better fishing for whom? Telling people that they can no longer fish streams and only ponds is probably the dumbest thing I have ever head. I am moving more towards being "pro-dhalo" but shutting down all PA trout streams from bait fishing is about the most rediculous thing I have heard.
