And I cringe when I see so much arm-chair quarterbacking from people who only have their own personal preferences in mind when they advocate certain management policies.

I cringe at such statements.

Why? Does one person's opinion carry more weight than any other person's?

I am fine with voicing opinion, and appreciate hearing differing opinions, but should any one opinion become policy?

David, I agree with you 100%. There are many different options in trout management, and different options are in fact used in other places, so are worthy of discussion and consideration.

I was not cringing about anyone's sincere opinion on trout management. People have their opinions on these things, they have their reasons, and it CAN be a good discussion.

I was cringing at this statement: "I cringe when I see so much arm-chair quarterbacking from people who only have their own personal preferences in mind.."

I also cringed at an early statement that suggested that anyone who held a particular view on trout management must "feel privileged" or be on "a high horse."

And I stand by both cringes! 😊
