Guy, seems some of you can't read, SEE POST # 15, I talked about fighting the fish and using a net.

I'm not sure how providing additional information indicates an inability to read.

All of the tips you provided in POST #15 ("Play the fish quickly, use a landing net , wet your hands, use barbless hooks, and use forceps.") had already been pointed out somewhere in the previous 14 posts so I'm not sure what the deal is here.

You and several others pointed out that a fish should be played and brought in as quickly as possible. I just thought a little more info could be provided on that topic.
