Hello Everyone,

I'm Frank and I am brand new to this forum. I'm in Lebanon County and I have off a lot of the week because my classes are scheduled only on tuesdays and thursdays so if anyone needs a local fishing partner pm me. My question for this forum though is in regards to muddy creek. Ive been fishing on the muddy when i was younger on the woodbine section but i have never fly fished it. Im planning on heading up this weekend with a friend to explore the ATW section as well as the some of the other unregulated sections to see what i can find. Just wondering if anybody had any fly suggestions for the area this time of year.

Thanks!
