grannoms have a small possibility of happening. Have caddis in 3 forms.

Dries - dark body, light wing

wet - dark body and dark hackle

nymph - green weenie, or some sort of green caddis pattern. Or even a cased caddis with some sort of green in it.

Besides that, these are stockies, so glo bugs, san juan worms, wooly buggers, and basic nymphs like hares ear, pheasant tail, princes, etc should all catch fish.
