A 2 fish per day (no size) limit would be nice. It would discourage those who feel they have to come home with a basket of trout every time they go out.

I agree. And the 2 fish per day proposal is not for a special regulation, but for a general state-wide regulation.

That's the way it is done in MD. The limit on unstocked trout waters there is 2 fish per day, state-wide.

That way it does not draw attention to particular streams.
