helpful link, thanks!

Where is all this water coming from? We havent had a rain event in awhile and the last time i was there a few weeks ago, it looked like most of the snow was off the surrounding ridges. It was flowing around 1200 then too. Ugh, I really didnt want to have to fish meadow run, but it certainly looks like i will be. Even if they cut it 1,000, I am still not fishing in 2,500+ flows.
