pat yeah I could name some schuylkill cty streams that I'd wish were not stocked... if I were the only one involved. but people like the stockie fishing, and I can find unstocked wild trout water, or just hike away from the road on the ones that are stocked.

real world; there will be stocking. there are many more stockie-only than wild-only fishermen. there are so many streams with some wild trout that there will be stocking over wilds. calls to stock over the weaker C&D wild trout populations but not the stronger A&B populations seem to be based on concern over wild trout fishermen versus wild trout fish!

I actually think that the status quo isn't too bad.
