look up youth fishing waders. DO Not buy the white river ones they just brought out at bass pro. Im not sure that they fixed the seems in the leg, which is the same design as the adult. The wader at the feet fills up with water and its like you have twenty pound feet. Def not what you would want your kid wearing. Believe me man, for a time I was trading wader after wader after wader there. Its not that hard I dont understand why they still sell them.
