Does anyone ever fish this area? Know why it is not stocked?

It is an absolutely beautiful creek with quite a range of settings in the areas before the the spill in to the Susquehanna. I have caught smallies and some sort fat smelt looking fish I can never find a picture for and a few browns i would assume they are naturals? anyone have any ideas here?

The silver fat faced smelt looking fish are a great amount of fun on a 3wt and hit floaters and nymphs.
