chewing snuff...

URL:

Im a snuff chewer and was wondering if residual snuff on your fingers, after I put a dip in, affects fish. I try to rub my hands in dirt or grass to mask it but was wandering if anyone did a self "study" on this. The reason im asking is because an old timer i met on two lick creek used to spit on his bait/lures.

Sorry if this is wrong section to post this. Seems like a noob question.
