Dear Board,

Though I can't say that I've personally caught many there are far more trout that spend a portion of the year in the Susquehanna than you would think.

Go to the Flubberdam the week after they air it up in the Spring and check out the activity at the abutment on the Shamokin Dam side. I've seen it look like a hatchery raceway more times than I care to remember, I've even seen Pallies in the mix.

Regards,

Tim Murphy 😊
