Look at maps online or just look at a PA highway map and figure out what state forests are close to you. Then Google the name of those state forests and get their phone numbers. Then call them, and they will send you a free state forest map.

Then you just fish the small streams in those state forests.

Also figure out which state gamelands are nearby. The PGC no longer makes printed maps. But they have the SGL maps on the internet.

And as dryflyguy said, get the DeLorme Atlas.
