Tim,

Here is what I am currently using.

[http://www.cabelas.com/product/Creek-Company-Float-Tube-Fins/709457.uts?Ntk=AllProducts&searchPath=%2Fcatalog%2Fsearch.cmd%3Fform\\_state%3DsearchForm%26N%3D0%26fsch%3Dtrue%26Ntk%3DAllProducts%26Ntt%3Dfins%26WTz\\_l%3DHeader%253BSearch-All%2BProducts&Ntt=fins&WTz\\_l=Header%3BSearch-All+Products](http://www.cabelas.com/product/Creek-Company-Float-Tube-Fins/709457.uts?Ntk=AllProducts&searchPath=%2Fcatalog%2Fsearch.cmd%3Fform_state%3DsearchForm%26N%3D0%26fsch%3Dtrue%26Ntk%3DAllProducts%26Ntt%3Dfins%26WTz_l%3DHeader%253BSearch-All%2BProducts&Ntt=fins&WTz_l=Header%3BSearch-All+Products)

I think my problem is a combination of the "boot" structure and the fact that I have fairly small feet, 8.5. On the up stroke I tend to try and arch my toes up for some reason and that puts tons of stress on the top of my foot. I have tried just not doing that, but I can't break the habit. I figure if I go to the force fins, no power is required on the up stroke so maybe that will help me out. As far as getting to the water with fins on, I typically put them on after I am sitting in my tube so I am not too concerned with that aspect. Are the force fins adjustable enough to wear wading boots with them?

I appreciate the help on this. I would just really hate to get a pair and then regret it.

Mike
