I was fishing the little lehigh one time and I looked downstream and saw a line of geese coming up. The stream was only about 12' wide in this area and the geese were single file when they got up to were I was fishing I had to stop fishing so I just started counting them 65 geese all in a single file row. Unbelievable they stretched as far as I could see. Another time I was at hopewell lake just checking out the dam and got too close to a pair of geese that must have been guarding a nest they starting going ballistic and I started backing off but I noticed that every goose that was out on the water immediatly turned and started swimming directly toward the commotion probably 25 geese. Animals are awesome!
