I do alot of shad fishing down at conowingo and deer creek this time of year. Nothing like migratory fish on the fly!! I typically get them on the swing at Deer Creek. Almost like swinging flies for steelhead except the flies and the fish are smaller.

I fish a mix of bright flies and drab flies. One of my favorites is a small brown speyish type fly with orange mallard flank fibers for the wing.

Hoping to head down tomorrow morning or afternoon. Already caught a few in the susky, but not in big numbers. This warm weather should help to break things wide open.

Frank
