There are several viewers. Personally, I like the lightning bolt/preview data thing, as it gives you the best topo map combined with the highlighted info.

Lots of maps there to use. Personally, I use the "stream sections that support wild trout" the most, and "class A wild trout streams" the second most.

If you're a GPS/smartphone guy, UFMGuy has some of these applications available for car based GPS units, and more of them available for smartphones.
