I am heading up to Penn's Creek for three days of camping and fishing April 18, 19, and 20. We will be camping at Poe Paddy. I am not sure how long the Grannom hatch lasts, but I am expecting the tail end of it and probably the Hendricksons to be on strong. What colors and patterns would you guys recommend to tie? If I recall, they are a light pink body there? Does anybody remember for sure? I also recall some red quill action in the past, but I am not sure if that was a Hendrickson variety or something else hatching that time of year. Rusty spinner for dusk?
