Yeah, it doesn't help that there is a long flat stretch that gets a bunch of stockers dumped in it right next to the boundry of the open water. Almost an invitation. But as I said earlier, I still have no trouble catching a decent number of fish on LSC so I'm not too worried about it.

I suspect TU will dump some adult sized fish in but I would rather they not. I would like to see what happens without any adult fish stocked. I think some pretty impressive fish would turn up if we could get a few years with lowered pressure fishing pressure in the FFO area and less appeal to poachers.
