You guys see any ospreys on the river? I've never seen any in the upper river, I think I used to see them in FEW years ago, but haven't been there recently. The upper, flooded section of FEW is about as text-book osprey habit as you can get. I did see an eagle in the river, and it did not move for about 10 minutes. The biggest fish eater I see is the dreaded merganser, quite a few in the upper river..water rats.
