I really like fiberglass flyrods but not for nymph fishing or throwing any heavy weight. I use mine primarily to fish dry flies. I have three favorites. The first is an old 1971 vintage Phillipson DF76 Deluxe "Swamp Fox. The second is a first series model Diamondback "Diamondglass" 7'6" 3 weight. The last is an old but nearly new Cortland "Pro Crest" 7' for a 5/6. All three are great for delicate presentations but just as important they are just plain FUN to fish with. 🏆
