My set up is about 1/4" off from being blanced when placing my index finger at the end of grip. It is a 10' 4 wt. I never noticed it out on the stream.

Attack, didn't you inform me that some people may bump up a reel size to prevent this blanace issue.

If you do that should under line it? (10' 4 wt rod, 5 wt reel, 4 wt line?)
