I have stayed there back in 2007 and their stretch of water is very nice. It is hard to say right now what would be hatching in may because of weather and flows, but I would have sulphurs in 14, 16, 18. All sizes of olives. March browns size 10 2xL, grey fox size 14, Iso size 8 2xL and 10 2xL, a caddis selection.

Take just about everything you have that is close to bug week there you could see about anything.

Nice avatar is that your dobe? I have 1 as well.
