I was chucking a black rabbit strip bugger at a group of large carp trying to aggravate one into taking it when the dark torpedo shot out of nowhere and hammered it. The Smallmouth season was on! I caught six of them in a very short time period in the same hole. I was fishing in Mill Creek, Lancaster Co. Have lived within 2 miles of this stream virtually all of my life and this was the first SMB I ever caught in Mill Creek on the flyrod. The water temperature was a balmy 66 degrees already. The smallest was 6" and the largest was about 12". They all looked very healthy with nice color. It's always great to find a new "honey hole". I'm pumped!
