You have to remember some of the stocking was done well in advance of the season, at least in the Southeast. I went out late afternoon (Opening Day) on a fished over pool in popular Ridley Park, and landed at least a dozen on a tan bh caddis pupa; my go to pattern that I fish all year long. The only reason I only brought that many to hand was my rusty skills; rolled or missed at least twenty more in the few hours I fished. Bottom line; if they aren't feeding they die.
