Thanks for the info LR. Facebook updating to keep people informed of the most up to the minute release,mm. I think they should do it on the main site, the fisherman are probably older and some people just don't like handing Zuckerberg their private data.

I thought the home pages of the profiles could be made public for recent updates to people without an account, dunno. Well, hopefully people take their kids to the Lehigh up high where it is stocked to get some fishing in if the flow is controlled. I'm not sure if I am going to go through the area or not to check out the number of people and get some exercise and fishing in.

Have you ever helped stock with the PFBC? I wonder if they let people take pick ups down the bike bath to spread fish around or if they just dump most at the bridges. They still stock fingerlings right? I think they must take something all the way down the road right at the outflow, or maybe they go down the gated road that runs parallel to the river and dump in there, dunno.
