New Rod 10' or 11'

So I have been trying to make up my mind about what new rod to get for nymphing. I am leaning towards the greys stream flex rod and don't know if I should get the 10' 3 or the 10' 4. I have also been considering an 11' rod, but I am thinking 10' more. I fish mostly limestone spring creeks around PA, but also fish out west in eastern wyoming and larger waters all over the place. If anyone has any suggestions they would be greatly appreciated. Like I said I plain on contact nymphing with this rod. Thanks!
