I fish the wild trout sections of Kettle, I fish the gorge and a couple of other less used areas of Pine, but those areas are stocked. For the most part the fish look decent in the sections of Pine I fish, but they are stocked fish. Not what I'd call pretty, they are mosly browns a bows. Most of the bows are nice the browns not so much. When fishing Kettle there are many miles of wild trout water on the main sections of the creek down to about Carter Camp. Most of the water above that isn't stocked.
