Scored it on sale \$19.99 + \$6 shipping, just got it in the mail today. And I can say I am definitely glad I grabbed it up. Thought the light end of the drag is still pretty grippy it's going on my 5 wt so I figure the light stuff I won't use the drag as it has plenty of power for bigger stuff.

Sharp little thing, and can't wait for the ocean falling from above to go away to see what it fishes like. And heck full aluminum disk drag for even \$30 retail I guess why not?

Oh and to top off my little story one little detail I forgot, backing 😬 damn it.
