Parking? Very limited. Just south of rabbit rd is Manada bottom rd bridge but there is a new guard rail that limits parking...south end of guard rail is room for maybe 1-2 cars. Further south is Kiwanis rd bridge and has a few spots on west end....best bet is just drive over and see where there is a small pullout near bridge and hope there is not more than 1 other car already there which likely there won't be until it gets stocked again. Make sure tires are not on paved road otherwise may get ticket.

p.s. there were no floats outside the special regs but was hi water when stocked so likely fish spread out.
