I remember back in the day when they implemented the big bass regulations from the fibre dam and below.....all the old coots were pissing and moaning.....then, 3 years later--the same old coots were bedazzled at the size of the smallies they were catching.....

hopefully the Susqy can make a comeback.....I am heading there this weekend for the first time in almost 10 years.....I hope to just catch something.....but, there are plenty of walleye, carp and cats to catch also.....but, you have to love the tug of a smallie!!!

ps....if I had an extra 25 bucks--I'd surely send it to them.....
