Fishing the D River I took out my Mayfly Dry Box to select a fly and dropped my box in the water.....gone!.....no MF dries to match the hatch! All I had was a dry fly box with Caddis and a few Stonefly patterns. I selected a fly to match based on size and light or dark color, and did some surgery with my scissors. I had one of my best days fishing dries. That day taught me a few lessons:

Presentation trumps pattern or color or shape (with an honorable mention to reading the water)

Altering a fly to make it ride on, in or under the film often makes all the difference.

Attach lanyards to all my fly boxes! (haven't lost one since)
