I seem to like the same spots everyone else does. For me, it's a non secretive TN tailwater. I've spent countless time and hours finding a replacement. There are a few go to quiet spots when #1 is blown out, but I like ole' reliable.

In the spring/fall for steelies, it's upstate NY SR.

In PA, I'm a rookie still, but when I am/was there LL, Tully, YB, D come to mind. Anywhere I can wet a line and have a chance at a trout is my favorite.
