Take a quick look at the number of new roads that have been cut into the watershed for wind-farms, pipelines, gas wells and other uses. Very sad if you ask me and its only just started.

what's the green arrow pointing at and where would Mountain Springs lake be on that map? It's been a few years since I've ventured back into those headwaters, was loaded with brookies back then. with the problems Fishing Creek and its tribs have it will really suck if this stream is ruined.
