yes - flats off of 252 down from the covered bridge (not the 23 bridge). I only fish this section on my way home from work when I have about a half an hour or so.

yes - on stealth, and slow wading. I fish some stretches on my knees on valley so I'm no stranger to stealth.

yes - on upstream presentation, 95% of the time

I'm not talking straight downstream, I'm talking down and across with a slack line cast knowing all of the draw back on hook setting etc. I'm probably wrong but I have to try it on this section to prove myself wrong. Note: I got a couple of strikes on a 14 BWO, probably would have done better on a 20 midge but still, I got skunked and feel like I would have done better w/ a down and accross presentation.

I've had sucess with this method in other pools on VC.

The water on this section is so glassy that I feel like any disturbance on the surface, no matter how minor, puts the fish down.
