Hey all,

A really good friend of mine just started a clothing line focusing primarily on custom GD clothing and its really awesome stuff! At any rate he told me I could basically make anything I wanted in line of hoodies, t-shirts, hats, etc. So Im trying to put together a flyfishing/Grateful Dead hybrid design. All the work would be done with an embroidery machine and will literally outlast the garment itself. So reaching out to the board because im fairly certain ive come across a fair amount of folks who would be into the idea.

All ideas would be welcome!
