If all the years of my fishing experience on the Gun, I've never seen bait containers. I have met anglers at the parking lot with spinning gear and explained that the Upper Gun is unstocked. They were all unaware of the stock locations further downstream. I've seen very few spin fisherman there as well. Good decision on calling the DNR, but usually a friendly conversation and pointing th in the right direction goes a long way.

Great report Steve. I was there before the flow spike last week and strictly sight fished for risers with dry midges. The temp spikes have a tendency to make the browns hold a long the banks. I had an awesome day in the 4 hours I was there 11-3.
