Yeah I cast in the back yard all the time, especially if I ha e something new to play with. a little piece of mariboo or some of a cotton ball to stop the "whip crack". Also never cast just a line, the whip crack will destroy the tip/loop.else wise cast way.

I once read put objects around your yard in different spots to use as targets . I believe that was pcray who wrote that, but id doubt the first to ever write it.
