I just picked up the Mystic Reaper (9ft 5wt). What an awesome rod for \$200. I figured I would give it a try for the money. I have no trouble throwing out some heavy weighted nymphs or streamers across the water or into the wind. Like everyone else I probably have too many rods but this one is becoming #1 with me on the water. I came very close to biting the bullet and buying the Hydro. I just couldn't justify spending \$800.
