I'm convinced that my increase in small stream fly fishing played a MAJOR role in my weight loss this past year. I'm a huge supporter of the idea that fly fishing is indeed exercise!

The first time I fished with Sal, we went to a small Lanc freestoner. I was about 345lbs and struggled desperately to keep up. I fished that stream on Saturday and rocked it. No problems at all. Love it. Its my favorite kind of fishing.
