Just moved to the shipensburg area. I am relatively new to fly fishing and I'm looking for a little advice. I fished the Big Spring Creek fly fishing only section the other day. I saw alot of fish. However not much activity. I saw only 2 fish hit the top of the water in 3 hours. I fished several patterns both dry and wet. I was however only limited to some flies I could pick up at a local store as i have not moved all my tying equipment and flies down here yet. Going home this weekend to get all my stuff after what I saw. Only had one small brookie chase on one cast. I noticed only some very small flies around the stream. Any advice on patterns for this stream and some others around this area? Thanks in advance!
