Hit it yesterday on my way home from work. (Thursday.

Was a nice overcast day and no one to be seen, at least the stretch that I fished.

Water running about 25cfs according to the USGS web site. Water temp 56 degree on the two spots I checked.

Took Papparise's cue and started with a brown caddis and caught 3 smaller guys on top, smaller but still fun to catch on top.

action died around 3:30 so tried a couple more flies, BWO, Grif-nat all to fail, so called it a day and decided to try and beat the traffic home.
