I fished from 10 til 1 today and had a nice few hours. Saw a few caddis roaming around and it appeared the fish started to move a bit into faster water - Subtle but noted.

I used a size 16 Elk Hair caddies with soft hackle dropped off 12-18 inches. I would try to extend a realistic drift as long as possible and use a quick strip retrieve to imitate a fast emerging caddis with my soft hackle. Caught a few on top and a few more on the dropper.

Fun day to be out stalking car thieves.
