I have all ways tried to be a law abiding citizen but did not understand the Md migratory law. I have my Va salt water license that is honored in Md and my Pa migratory permit. These do NOT meet Md tidal migratory requirements. Also Noaa is Not accepted. Only a Md migratory registration is accepted. I did not believe or understand it but a friend sent me to the Md web site and was correct. He was behind Conowingo dam yesterday and law enforcement needed help keeping there pencils sharp. Please check each states requirement before fishing.
