That's the site I reviewed when I said I reviewed MD. licenses and permits. It's also the site I used to purchase my licenses from. You do realize that the regs. are completely different above and below the dam. Neighboring State licenses that are valid above the dam are not valid below the dam.

I guess I'll just stick with what I've got until I get written up.

Oh, by the way, I caught 23 shad below the dam last Wed. I was the only guy fly fishing so I doubt anyone from this board was there. I didn't see the spin guys catch much of anything. It's always nice when a fly guy can clobber the spin guys. Especially if you're the fly guy.
