What's in the belly of the trout in the 3rd photo???

When I had a shop here in Galeton a guy brought in a racoon's foot that he pulled out of a brookie's stomach from a beaver pond!

It felt big to me, lots of stuff in there but one larger item. Coulda been another fish. When I was bringing in a small 5" fish a 15+" fish came up from the depths and broke water after it.

Definitely had the feedbag on after the heavy rain last night.
