It was very windy for me today. And I was fishing in a willow tunnel. Once I realized I couldn't beat it I waited until it stopped for a second and punched out a cast. It was one of the connecting with nature moments that made the day so much more rewarding.

I could have been ticked off at the wind but we shared the day together. She gave me broken water to disguise my presence most of the time and short windows to cast. A good friend!

I was out fishing with her on Spring creek yesterday myself, she can be a fickle friend in deed.
