I've caught a few fish on buggers. However most of them happen to be bass where both bass and trout are in the area. I'm curious to know what size buggers you use for trout. I have mostly tied size 6 because i'm limited on my tying resources. And have also tied a few smaller ones on size 10 hooks. I vary color, weight, presentation, whatever. Just curious to see everyone elses input on my little bit of bugger trouble.

p.s. If anyone read my thread on odd color tying materials I tied a bugger the other day... black chenele, black palmering, gold tinsel wrapped around the body and the pink marabou I got for the tail with a little bit of flash. Looks awesome! can't wait to try it out!
